Specialist brain injury rehabilitation service in Staffordshire

# About Voyage Care

Voyage Care is the sector leading health and social care provider with over 30 years' experience in specialist care and support. We enable adults and children with learning disabilities, autism, brain injuries and complex needs to **live the lives they choose** by offering person-centred care.

**The people we support are the centre of all we do.**

Our purpose is to deliver great quality care and support and our vision is to make a lifelong difference to the people we support and their families. Our values guide how we work and the behaviours we expect as we deliver our core purpose.

\*Data accurate as of November 2021

**95%\*** of our registered services in England are rated **Good or Outstanding**

**100%\*** of our Scottish and Welsh registered services are graded overall compliant.

# Brain injury rehabilitation

At Voyage Care, we work intensively with multi-disciplinary teams to **rehabilitate and provide on-going care and support** for people with brain injuries and complex needs. Our specialist teams use a collaborative process that encourages, educates and **supports people to take control of their lives** after a brain injury and regain their independence.

Focusing on **improving your quality of life**, we work closely with you to ensure support is:

1. based on individual needs,
2. guided by individual goals,
3. based in the community, and
4. inclusive of family and support networks.

Through **person-centred and individualised support pathways**, our rehabilitation programmes aim to improve function and reduce restrictions.

with on-going  
support if required

# Brain injury rehabilitation process

Our specialist teams are here to support you through every step of your rehabilitation journey.

*During the 6 months my son was supported by Voyage Care, the staff brought him back to good physical health and worked hard to improve his state of mind. We can't thank them enough.*

# Transitional living

The majority of our residential services also have a number of fully equipped transitional living flats.

With their own open-plan kitchen, living and dining room, bedroom and wet room, these flats provide a more independent setting. They allow you to safely move on to the next step of your rehabilitation pathway, which includes:

- **An initial 12-week assessment period** to assess the possibility of moving into supported living or back into the community.
- **The creation of goals** to reflect the level of support you need to live as independently as possible.
- **Regular reviews** and package adjustments to ensure successful outcomes.
- The opportunity to trial **independent living** within a safe environment.
- **Sessional rehabilitation** through our specialist neuro-therapy team, implemented daily via dedicated Therapy Co-ordinators.

# Assistive technology and specialist equipment

We can help you take advantage of personalised technologies to help you become more independent, enhance existing skills and support you to safely take positive risks.

We work with partners, such as Appello, to provide the latest options in assistive technology.

We can provide:

- **Specialist physio equipment**, such as Tilt Tables, adapted treadmills & exercise bikes, ceiling tracking hoists and access to hydrotherapy.
- **Specialist occupational therapy equipment**, including dedicated training kitchens, adapted and specialist SALT equipment, such as Talk-tools and communication aids like I-Gaze.

Examples of assistive technology that can be accessed if support is needed, include:

- **Sensors on the bed or chair** that tell our staff if they are occupied and alert us if support is needed.
- **Epilepsy sensors** to detect seizures.
- **Environmental controls**, helping you turn a TV, or lights on and off, or open and close the curtains and doors.

# Therapy services

Our focus is to help **increase your independence** and work towards returning home or to a less dependent living setting. Our structured environments provide regular programmes of sessional rehabilitation, provided by our specialist neurotherapy teams and implemented daily by our dedicated Therapy Coordinators.

Our specialist Behaviour Therapists provide support to **monitor and manage behaviour** including verbal, physical and sexual disinhibition.

Part of our rehabilitation support includes helping you to manage these additional needs through detailed support plans.

We understand how important it is for you to progress towards independence. We use proven methods to monitor progress and help you improve your skills.

Specialists you may be supported by include:

- Neuro-therapists
- Occupational Therapists
- Speech & Language Therapists
- Cognitive Behaviour Therapists

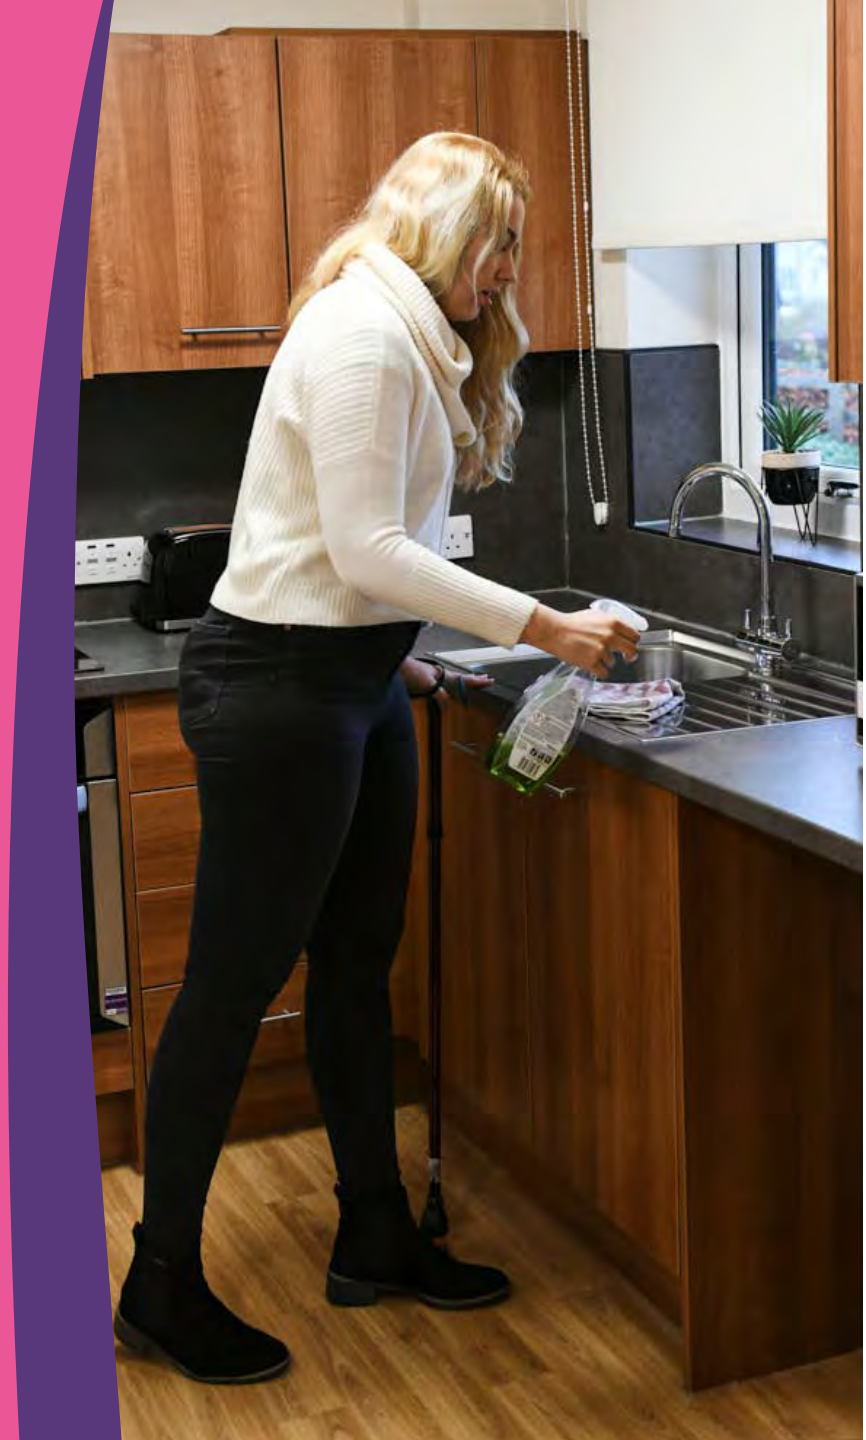

# Rugeley Road

Rugeley Road is our new brain injury rehabilitation service, and is due to open early 2022 in Burntwood, Staffordshire. It will provide support for up to seven people with **brain injuries, mental health needs or challenging behaviour**.

Ideal as part of a transitional pathway, or for long-term placements, this purpose-built house consists of **seven individual flats** with a shared communal garden. The flats are across the ground and first-floors with lift access. Each spacious flat is fully furnished and has an open plan living room and kitchen, wet room and bedroom.

Rugeley Road is perfect for somebody on their individual journey towards living the life they want. Our multi-disciplinary team are there **24 hours a day** to provide the specialist support you deserve. This can also include waking night support.

Located near Cannock Chase, there are lots of wildlife walks and views to enjoy. We have **good transport links** with a bus stop just outside. We're near to a local leisure centre, supermarkets, local colleges and pubs.
