

Lorenzo Drive

Specialist brain injury rehabilitation
service in Liverpool

Located in Liverpool, Merseyside, Lorenzo Drive is a **specialist brain injury rehabilitation centre**, providing high-quality care and support to help individuals regain their independence after a brain injury.

We offer **residential support, transitional living and supported living**, enabling us to support individuals through the **full rehabilitation pathway** while ensuring a tailored approach to recovery based on their specific needs.

We believe that recovery doesn't stop after initial medical treatment. Our team is dedicated to helping individuals **relearn essential daily living skills**, develop strategies for independent living, and regain confidence in a supportive environment.

About our home

- ✓ **Residential care** – For those who require 24/7 intensive support.
- ✓ **Transitional and independent living apartments** – Offering greater independence while still ensuring access to support.
- ✓ **Supported living apartments** – For those ready to take that next step to independent living.
- ✓ **Comfortable & homely environment** – All rooms have en-suite bathrooms, ensuring privacy for personal care needs. Our home features two communal lounges and an open-plan kitchen-diner, creating plenty of space for socialising and engaging with housemates.
- ✓ **Rehabilitation facilities** – A training kitchen, therapy room, and fully equipped gym support rehabilitation and independent living skills.
- ✓ **Tailored activities** – A wide range of individualised activities designed around personal interests and preferences.

Independent living accommodation

Our independent living accommodation ensures we can offer a full rehabilitation pathway to people with brain injuries. We have **12 independent living suites** to complement our 16-bed residential and supported living buildings.

Split across two buildings, our independent living accommodation features:

- ✓ Eight fully-furnished independent living apartments
- ✓ Four bungalows with private access and gardens

Both our bungalows and apartments have been **thoughtfully designed** to help the people we support **regain independence** while still offering access to support when needed. The bungalows, featuring private front doors and gardens, give people the opportunity to manage their own home and build confidence. The apartments offer a **supportive space** for those working towards greater independence.

In addition to promoting independence, our independent living accommodation also encourages **integration with the local community**. With great transport links and access to local amenities and services, individuals will have opportunities to engage in social, educational, and vocational activities. The service is perfectly situated to ensure the people we support can build relationships, access local resources, and take part in community life, further **supporting their rehabilitation journey**.

Lorenzo Drive floor plans

The independent living wing is made up of **two buildings**, building A and building B. Each building has been designed to support the progressive needs of the people we support along their rehabilitation journey.

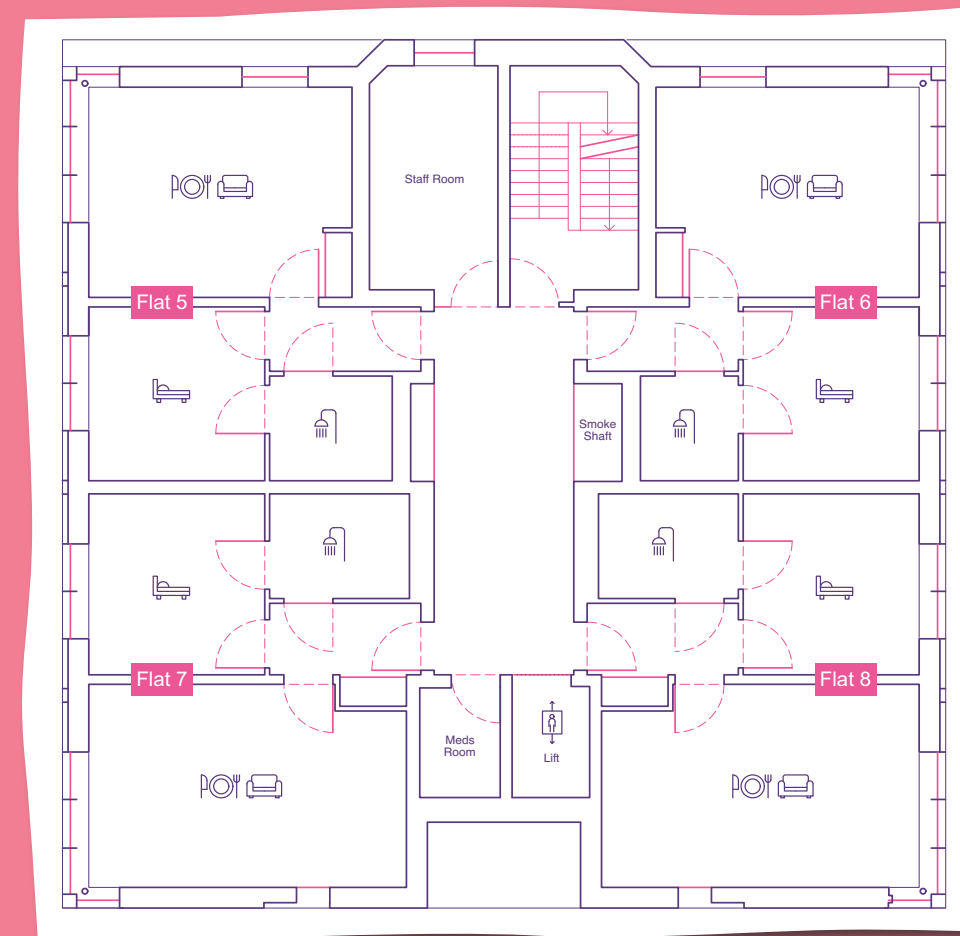

Building A

Ground floor

On the ground floor of building A, you'll find **four transitional living apartments**, along with some facilities for our team.

Each apartment includes:

- ✓ Your own kitchen, dining room and living room
- ✓ Bedroom with private en-suite
- ✓ Access to the home's communal areas including gym and training kitchen

First floor

On the first floor of building A, there's a further **four transitional living apartments** which can be accessed via a lift. There are also some additional staff facilities on this floor.

Both our ground and first floor apartments **promote the development of re-learned independent living skills.**

We recognise the importance of independence for those with brain injuries and the impact this has on quality of life. That's why our transitional living flats have been designed to **empower individuals** to take the **next step on their rehab journey.**

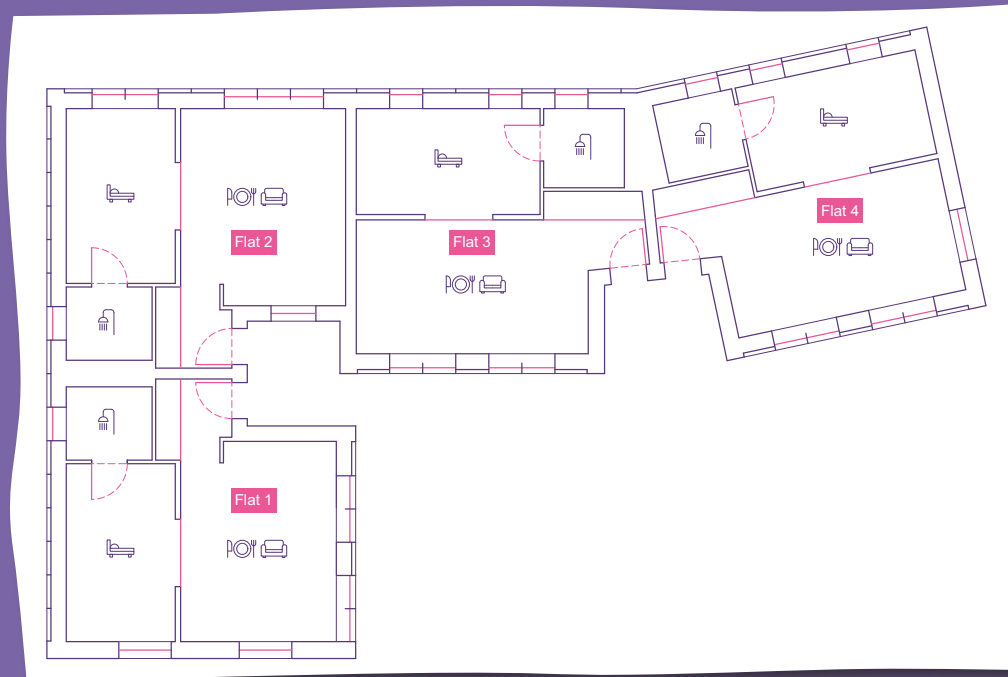

We'll complete **regular assessments** to review progress and when they're ready, we'll help prepare them for a move back home, into supported living or source long-term support.

Building B

Building B features **four bungalows**, each with their own private entrance and garden area. This wing has been designed to provide the people we support with even more independence while also enabling a sense of responsibility and trust which are vital throughout the rehabilitation journey.

Each bungalow includes:

- ✓ Private access via your own front door
- ✓ Your own kitchen, dining room and living room
- ✓ Bedroom with private en-suite
- ✓ Ground floor accommodation
- ✓ Rear garden

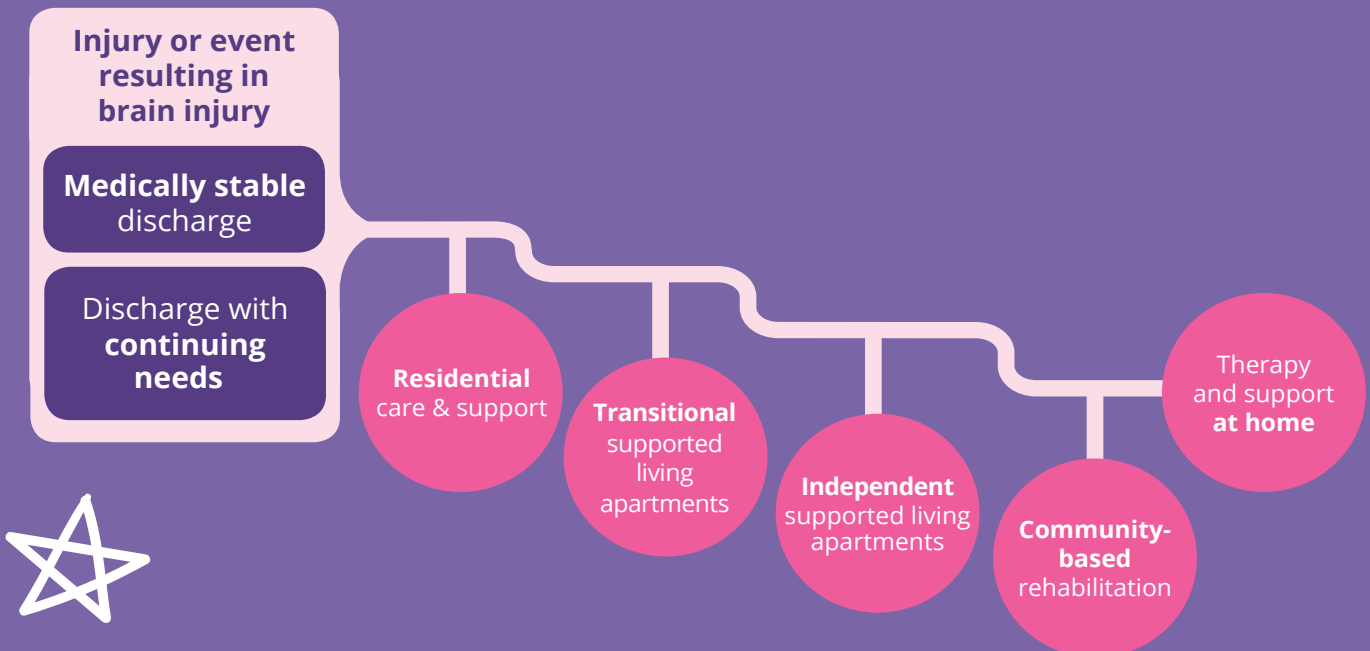

Our pathway

Our specialist brain injury homes are **stepping stones** towards independent living.

We empower the people we support with the **skills and confidence** they need to safely engage with their local community.

Using a **person-centred approach**, we'll co-create care plans that reflect what is most important to individuals so we can deliver positive outcomes that promote quality of life.

Our goal is to help individuals to regain lost skills and support them to rebuild a **meaningful future**.

Our approach

We work with multi-disciplinary teams to rehabilitate and provide ongoing care and support for people with brain injuries and associated complex needs.

With a focus on improving quality of life, we work hard to ensure our support is:

- ✓ Defined based on individual needs.
- ✓ Guided by individual goals.
- ✓ Embedded in local communities.
- ✓ Inclusive of family and support networks.

Our **collaborative process** empowers, educates, and supports people to take control of their lives and regain a level of independence that's right for them.

Through person-centred, rehabilitation pathways, we help people to make sense of their brain injury, live **fulfilling lives** and seek meaningful community opportunities.

Slow stream rehabilitation

At Voyage Care, we utilise the **slow stream rehabilitation** approach to brain injury care.

Focusing on **active support pathways** outside a clinical setting, we empower the people we support to set and achieve goals and work with accredited professionals to re-integrate back into community. This can take 6-12 months, or longer, depending on their individual needs.

Using a slow stream approach means we consider **social and emotional needs**, supporting people in a **holistic way**, so they can make progress at a pace that feels comfortable for them.

"Things were so dark, it felt like there was no light at the end of the tunnel. But the team at John Cabot House changed all that. They brought the light back and gave me a second chance at life!"

Ollie - a person we support

How we work with you

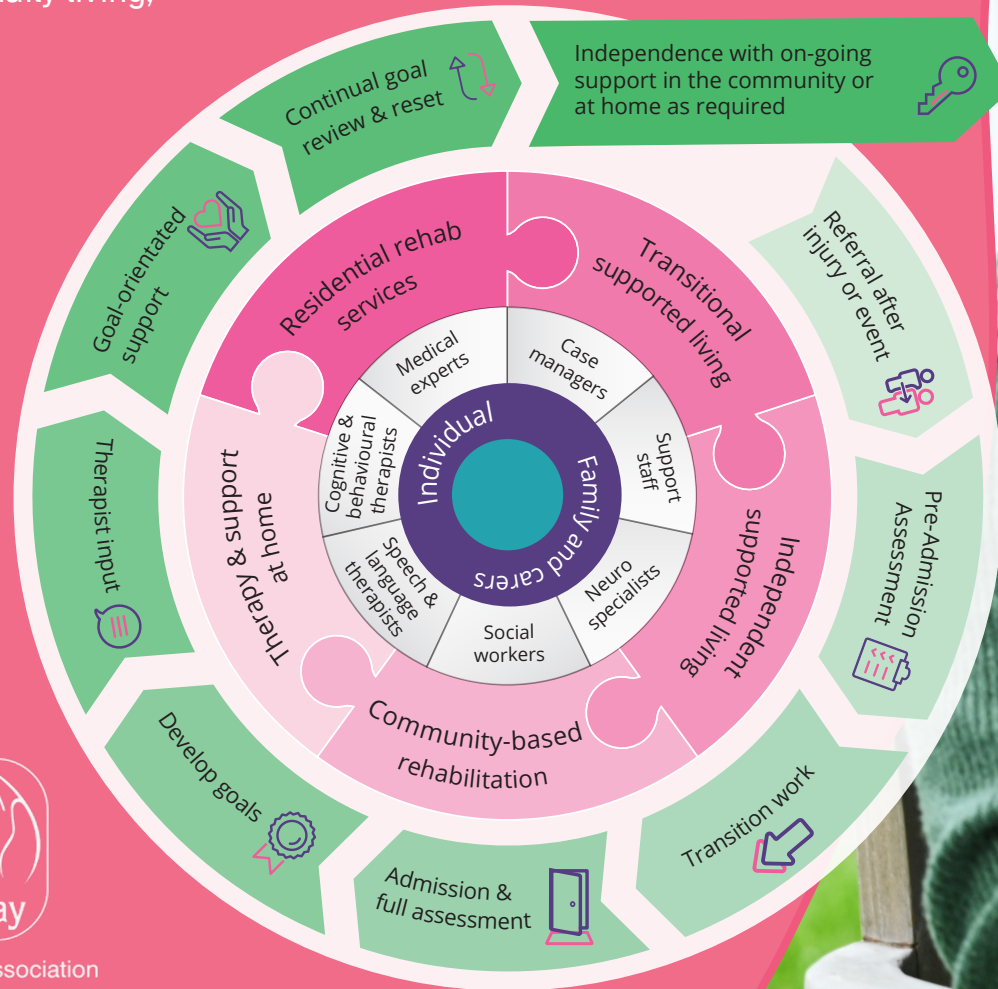

We work in partnership with you to achieve an individual's goals while supporting their **health, emotional, and social needs**.

We do this through **open communication** and regular reporting to ensure collaborative work that puts the individual first.

With a range of settings and robust, specialist brain injury support processes, you can rest assured we'll provide **positive outcomes** that meet the needs of individuals.

They'll develop all aspects of daily living, including preparing meals, carrying out everyday tasks and building social relationships.

Our specialist brain injury homes provide over **180 places** for community-based brain injury support. We develop services that are of a high-quality and based on **best practice approaches**, demonstrated by our partnership with Headway, the UK's leading brain injury
